GET account/midjourney | Experimental API for AI services

1. [Midjourney API v2](#)
2. `GET` account/midjourney

Retrieve Midjourney accounts information

December 2023 (May 5, 2025)

Table of contents

For your convenience, you can specify your Midjourney configuration values under your account so that you no longer need to provide them with every API call. If you specify multiple Midjourney accounts, the API will automatically perform load balancing by randomly selecting an account with available capacity before making calls to Discord / Midjourney.

This endpoint retrieves the complete list of configured accounts for Midjourney.

[200 OK](#)

```
{
    "Discord channel A": {
        "channel": "Discord channel A",
        "discord": "Discord token A",
        "maxJobs": 1-15
    },
    "Discord channel B": {
        "channel": "Discord channel B",
        "discord": "Discord token B",
        "maxJobs": 1-15
    },
    "Discord channel N": {
        "channel": "Discord channel N",
        "discord": "Discord token N",
        "maxJobs": 1-15
    }
}
```

Model

```
{ // TypeScript, all fields are optional
  [channel: string]: {
    discord: string,
    channel: string,
    maxJobs: number,
    pendingModMessage: string
  }
}
```

Examples

- [Curl](#)
- [JavaScript](#)
- [Python](#)

```
curl https://api.useapi.net/v2/account/midjourney \
    -H "Accept: application/json" \
    -H "Authorization: Bearer …"
```
