POST …/midjourney/channel | Experimental API for AI services

API useapi.net/docs/api-v2/post-account-midjourney-channel

Create or update Midjourney account information (retired)

December 2023 (August 5, 2025)

Table of contents

Important
We will be officially sunsetting this endpoint in January 2025.
Please use [POST account/midjourney](#) instead.

For your convenience, you can specify your Midjourney configuration values under your account so that you no longer need to provide them with every API call. If you specify multiple Midjourney accounts, the API will automatically perform load balancing by randomly selecting an account with available capacity before making calls to Discord / Midjourney.

> **https://api.useapi.net/v2/account/midjourney/`channel`**

Request Headers

```
Authorization: Bearer {API token}
```

API token is **required**, see [Setup useapi.net](#) for details.

Request Body

```
{
    "discord": "Discord token",
    "channel": "Discord channel id",
    "maxJobs": 1-15,
}
```

- **discord**, **channel** are **required**. Please see [Setup Midjourney](#) for details.

- **channel** value specified in the request body **must match** the channel value specified in the URL path https://api.useapi.net/v2/account/midjourney/**channel**.

- **maxJobs** is **required**. This value should be the same or less than your Midjourney subscription plan [Maximum Concurrent Jobs](#). Currently, it should be 3 or less for Basic and Standard plans and 15 or less for Pro and Mega plans.
  Important Specifying a higher number than supported by your Midjourney subscription will prevent API from functioning properly.
